### SUMMARY

Software Engineering student skilled in programming, web development, and database management.

Passionate about creating efficient, scalable and user-centric applications and solving real-world problems.

### SKILLS

- Coding: C, C++, Python.
- Social Media Marketing.
- Business strategy.
- Full-Stack Web Developer.
- Database: MySQL, Oracle.
- Analytics and Data Analysis.
- OOP, Testing, Debugging.

### EDUCATION

**Bachelor of Science in Software Engineering.**

University of Engineering and Technology, Peshawar.

Campus: Abbottabad.

(Expected Graduation: 2028).

### WORK EXPERIENCE

#### My Projects

- Satellite Data Acquisition Simulator  (Logisim Evolution) – Implemented registers, multiplexers, and memory units for satellite data processing.
- Smart Currency Converter (OOP in C++)  
Developed an object-oriented program to convert currencies with modular and reusable code.
- E-commerce Website (HTML, CSS, JavaScript, MySQL) – Built a web-based shopping platform with product catalog, user interface, and database integration.

#### Full-Stack Web Developer

- Designed and developed responsive web applications using HTML, CSS, JavaScript, React, and MySQL for seamless front-end and back-end integration.
- Implemented and maintained full-stack solutions ensuring optimized performance, secure databases, and user-friendly interfaces.
